

HEALTH FREEDOM NEVADA
Informed Consent, Religious Freedom, Parental Choice

Official statement from Health Freedom Nevada
regarding the Covid-19 vaccine

Health Freedom Nevada is an organization that advocates for our constitutionally guaranteed rights to informed consent to all medical procedures, parental rights to choose what procedures our children receive and religious freedom to choose or deny medical procedures.

As an organization who seeks fully informed consent and transparency regarding the use of pharmaceutical products, we are concerned with the speed and lack of adequate testing under which the Covid-19 vaccine is being developed.

The process to approve the Covid-19 vaccine is being fast-tracked through the Emergency Use Authorization process. Vaccine manufacturers are excused from all liability from any injury or damage caused to recipients in accordance with the PREP Act.

The goal for current trials is merely to determine whether the vaccines can lessen symptoms of mild cases with Covid-19. This vaccine can be licensed without demonstrating whether it can prevent severe Covid-19 hospitalization, death, or spread of the virus.

The cohorts studied did not adequately represent people over 65, nor under 16; nor did they study immunocompromised groups who are most at risk for Covid-19.

<https://www.bmj.com/content/371/bmj.m4037>

We are concerned about the post-licensure lack of Surveillance. Vaccine Adverse Events Reporting System (VAERS) has a capture rate of less than 1% of adverse events.

State health authorities are more concerned with messaging and making sure the “messages are received as intended” than they are with actual safety or efficacy of this vaccine.

There are additional ethical and safety concerns with the components of the vaccines being developed.

- mRNA
- squalene
- preservatives

- human cell lines from aborted fetuses

With little oversight, warp speed, highly competitive deadlines and the belief that they can catch adverse events after the vaccine is in use, we are concerned that the public who participate in receiving this vaccine, will inadvertently be the guinea pigs themselves.

Thank you!

Nancy Jones
